CAREER GOALS

SHORT-TERM:

Become a fresher of the company by applying. I want to work in a professional environment, with sociable colleagues, and good benefits.

LONG-TERM:

Learn knowledge, practice skills. I hope that in the next 3 years I will become a proficient Web programmer and achieved much success in my career.

EDUCATION

CODEGYM DA NANG

Java FullStack Developer

February 2023 - September 2023

DA NANG UNIVERSITY OF SCIENCE AND TECHNOLOGY

Civil Engineering

July 2016 - January 2020

LANGUAGE

English : Working proficiency ~ TOEIC 600

SKILLS SUMMARY

HIGHLIGHTS SKILL

- Teamwork
- Critical thinking
- Project Management
- Strong decision maker
- Complex problem solver
- Strong logical thinking
- Open-minded and learning attitude

TECHNICAL SKILL

- Troubleshooting and debugging
- Languages: Java, Javascript, HTML/CSS, ReactJs
- Framework: Spring, Bootstrap, Thymeleaf, Express
- Runtime : NodeJs
- Database: MySQL, MongoDB
- Tools: IntelliJ, WebStorm, VS code, Postman, GitHub

ORTHER SKILL

- Design
- Excel, Word, PowPoint

HOBBY

- Coding
- Listen to music
- Play soccer, volleyball,...
- Reading book

+ Responsibilities

- Software architecture design
- Ticket Booking Details
- Registration of Passenger Booking Information
- Building interfaces by HTML/CSS, Bootstrap5

+ Link GitHub

- Front-end:
https://github.com/C0223G1-Org/AirTicketBooking_FrontEnd
- Back-end:
https://github.com/C0223G1-Org/AirTicketBooking_Backend

MOVIE TICKET MANAGER - TEAM PROJECT

(5 member)

June/2023 - July/2023

+ Description

The project aims to build a website that allows customers to book movie tickets online

+ Technology

- Spring Boot, Spring MVC, Thymeleaf
- JWT for authentication and authorization
- Ajax, JavaScript, HTML/CSS
- VNPAY
- MySQL

+ Responsibilities

- Project Leader
- Authentication and Authorization with Spring Security
- Building interfaces using HTML, CSS, Bootstrap and JavaScript
- Sending an email to notify customers of completed payment
- Software architecture design

+ Link GitHub

- https://github.com/C0223G1-Module4-Team1/MovieTicket_Management

COURSES - PERSONAL PROJECT

November/2023

+ Description

The project involves building a website for selling online programming courses

+ Technology

- NodeJS with MongoDB
- Express Framework
- Node-jwt for authentication and authorization
- Upload file (*plans for further development*)
- Chat realtime (*plans for further development*)

+ Link GitHub

- <https://github.com/congnam197/Node.js/tree/main/Blog>
