About me

I worked in the finance industry for 10 years before switching to the exciting field of information technology. After gaining six months of practical IT experience, I'm excited to apply my knowledge in the IT industry. My path is a reflection of my desire to use technology, embrace new challenges, and promote creativity.

Experience

Apr 2023- Present

Developer

Bootcamp Java Web at CodeGym - Danang, Vietnam

- I had the honor of working on four real-world projects at CodeGym during an intense six-month bootcamp, which gave me a hands-on start in the information technology industry.
- I was able to become familiar in the Scrum process in addition to learning vital technologies like Java, Spring Boot, ReactJS, ViteJS, MySQL, and TailwindCSS thanks to this priceless experience.
- At CodeGym, cooperation was valued and encouraged, which helped me collaborate with others and accomplish goals. I have the abilities, know-how, and real-world experience from my time at CodeGym to succeed in the IT industry.

2011 - 2022

Deputy Head of Human Resources

BIDV Bank - Ho Chi Minh City, Vietnam

- After more than ten years of devoted work at BIDV, I've gained priceless knowledge and insight into the financial industry. I now have a thorough grasp of financial operations, organizational processes, and the complex dynamics of system and human resource management thanks to my experience with BIDV.
- This vast experience has improved my ability to navigate intricate operational environments with efficiency and enhanced my financial acumen. I am excited to start a new chapter in the field of information technology by utilizing this rich expertise.

Recent Projects

➤ Carve

02/10/2023 - 27/10/2023

- Description: Carve is an e-commerce platform that reimagines flashcards, helping customers remember knowledge through the Leitner's Box System and Spaced Repetition System theory.
- Technologies: Java Spring Boot, ViteJS, JWT, Facebook Login, MySQL, GitHub.
- Role: As the owner and full-stack developer, I manage the entire development process. I design the database, create a Java Spring Boot backend, and a ViteJS frontend. I handle authentication, including JWT and Facebook Login. I maintain the GitHub repositories, and focus on security and quality. My role encompasses both technical and managerial responsibilities, ensuring the success of our e-commerce platform for effective knowledge retention.

 - FE: https://github.com/mrhuyle/C0323G1_HuyL_sprint2_carve

➤ RetroCare

07/09/2023 - 25/09/2023

- Description: RetroCare is a online marketplace that aims to completely transform how consumers obtain pharmaceuticals and medical supplies.
- Technologies: Java Spring Boot, ReactJS, JWT, Facebook Login, MySQL, GitHub.
- Role: I have been given the task of defining the user interface and experience in my role as the Front-end leader. This include working together on the cart system, curating the homepage, and improving the product search and sorting functionality.

 - FE: https://github.com/C0323G1-Module6/C0323G1_Retro_Care

➤ RetroCinema

22/07/2023 - 05/08/2023

- Description: RetroCinema is an online platform dedicated to
- introducing movies and streamlining the ticket booking process for customers.
- Technologies: Java Spring Boot, Thymeleaf, QR Code, MySQL, GitHub.
- Role: As the team leader, I've taken on the duty of developing the logic for the project, setting up the database infrastructure, utilizing Git for version control, and doing tasks to make sure the project runs smoothly from start to finish.
