- JSP, Servlet, Thymeleaf, Webservice
- Ajax, JQuery

Other:
- Good teamwork
- Critical thinking
- Problem-solving skills
- Self-learning
- Research

ABOUT ME

▶ Having worked in a variety of jobs for years, I have come to understand the significance of information technology in all of my previous jobs. I made the decision to push myself in this field for that reason.

▶ I'm learning and working on full-stack projects at CodeGym Da Nang right now. After six months of study and experiencing hands-on practice at CodeGym Da Nang, I'm looking for a job where I can apply my knowledge to real-world projects in order to improve myself even more.

CAREER GOAL

▶ **Short-term:** Contributing innovative ideas to any solutions as well as developing the application in accordance with the clients' and business's specifications. Along with that, self-growth can be achieved.

▶ **Long-term:** Upgrading my technical skills, adapting to new technology, and becoming one of the key members of the company. I desire to develop myself into a skilled programmer within the next two years.
